About us

Kohavynska Paper Factory JSC is one of the few companies in Ukraine producing high-quality sanitary and hygiene products. The raw materials used in production are recovered (waste) paper and pulp.

The factory has undergone an equipment upgrade, with modern, modernised machinery now installed. Only highquality raw materials and materials are used to manufacture the products.

Products manufactured by the factory:

- base paper;
- toilet paper;
- paper towels.

We maintain long-term partnerships with European countries, and a large share of our output goes to export.Kohavynska Paper Factory JSC cares about future generations by helping to preserve a favourable environment.

Demand will always be there

Demand for sanitary and hygiene products has always existed, and always will.

These hygiene products are essential not only at home, but in every area of daily life.The market for sanitary and hygiene products is developing dynamically. People have grown accustomed to comfort and convenience, so the need for hygiene products keeps growing.

In the 1990s, per-capita consumption of sanitary and hygiene products in Ukraine was 1-1.5 kilograms. Today that figure is three times higher. Greater demand means greater opportunity for improvement and for developing new products.

Quality

We pay special attention to the quality of manufacturing sanitary and hygiene products at every stage of production.

From the careful selection of raw materials to the packaging of finished goods, every process is controlled to ensure consistent quality, safety and comfort for consumers.

Modern equipment, strict adherence to technological processes and continuous quality control allow us to create products that meet high standards.

We strive to make every roll of toilet paper and every paper towel soft, strong and comfortable to use, and to live up to the trust of our customers.

For us, quality is not just a product characteristic. It is a responsibility to everyone-who chooses our products for themselves and their family every day.

Certificates

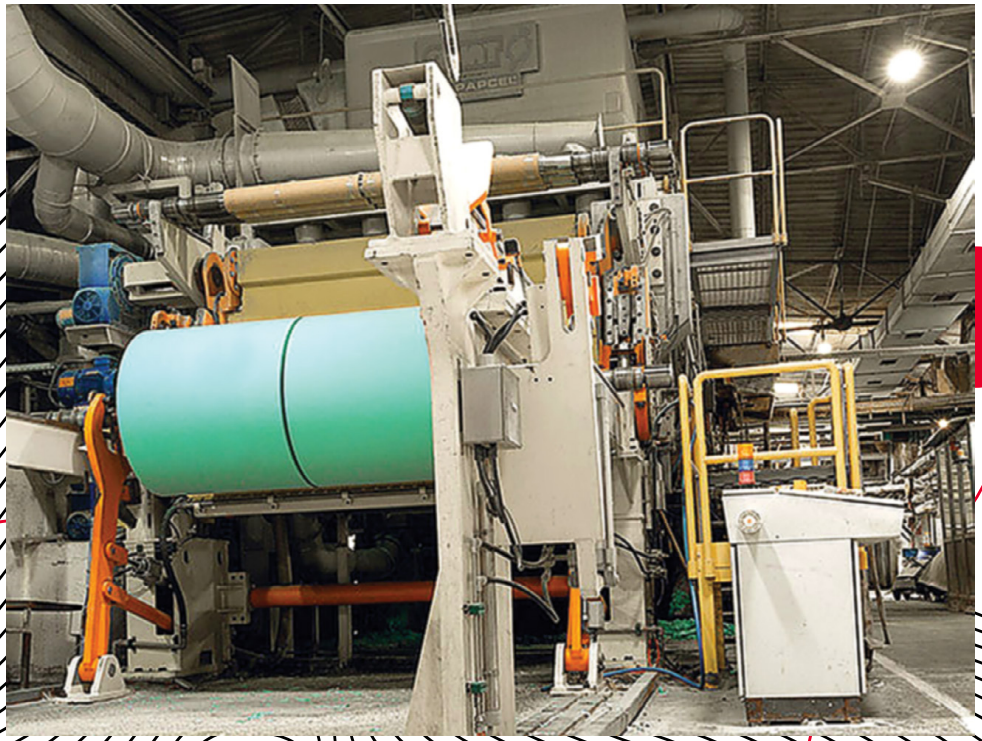

Because quality is the fundamental rule we follow when manufacturing our products,the company has implemented a quality management system in accordance with DSTU EN ISO 9001:2018 (EN ISO 9001:2015, IDT; ISO 9001:2015, IDT) and DSTU ISO 9001:2015 / ISO 9001:2015, as well as an environmental management system in accordance with ISO 14001:2015 and DSTU ISO 14001:2015.

Compliance with all these norms and standards allows us to manufacture products of a quality that competes with ease against leading European manufacturers, and that remains a favourite choice of millions of consumers across the domestic market.

Recovered-paper products

The production process begins with inspection of the raw material (recovered paper). Physico-chemical laboratory technicians carry out the relevant analyses at the wet end of production, including on the finished product. All monitored parameters are checked in accordance with the company's current regulatory documentation.Technological regulations and technical specifications have been established, under which quality is controlled at every stage of production, together with compliance with all norms and standards required by current Ukrainian legislation.

One of the key processes for ensuring the microbiological purity of the base paper is steaming and drying. The steam is heated to a temperature of 179°C, and all the raw material (the recovered-paper stock) passes through it.

Virgin-pulp products

For the production of these goods we use only the finest raw material, the origin of which is confirmed by FSC certification. Pulp is sourced for us from all corners of the world - Brazil and Uruguay, Canada and Finland, Poland, Slovakia and the Czech Republic.

The properly processed fibres are blended in the required composition to achieve the best possible softness and bulk in the paper. The base paper is produced on a paper machine made by A.Celli (Italy), one of the world's leaders in equipment of this kind. The production line uses unique solutions for web forming and drying, and for gentle reeling.

The combination of European equipment quality with the high skill of our specialists allows us to manufacture premium-quality paper with minimal use of natural resources and minimal impact on the environment.

Our team

Our people are the main capital and the greatest pride of our factory.

More than 550 professional employees work at Kohavynska Paper Factory JSC.

For many decades we have been a responsible employer, providing a stable wageand opportunities for professional growth.

About the products

We offer a wide range of products made from environmentally friendly recovered-paper raw material: toilet paper with and without a core; paper towels in rolls and in sheets. All of our products feature embossing and perforation.

Our paper products meet all regulatory requirements for microbiological indicators.

We manufacture products under our own brands: Kohavynka, Mildi and KOHAVYNSKA PAPIRNYA. At the customer's request, we also produce private-label products.

Our company has recently launched a new production line for virgin-pulp products (toilet paper and paper towels).These are premium-quality products featuring laminated embossing and perforation.

A special production technology ensures strength, softness and comfort in use, while an interesting range of designs lets everyone choose the product that suits them best!
